Advanced Features  
(coming soon)

### THE INSIDE CONNECTION TO YOUR ENGINE

Introducing Senzit, the new digital smart filter monitor. Replacing analog air filter service indicators, Senzit from NAPA Filters gives you access to the condition of your air filter anytime, anywhere via your smartphone. Just plug the rugged sensor into the air handler service port and download the Senzit app. In return, you'll receive accurate data that will help you protect and maintain your equipment, saving you time and money.

Filter Dust Load

### YOUR SMARTPHONE KNOWS

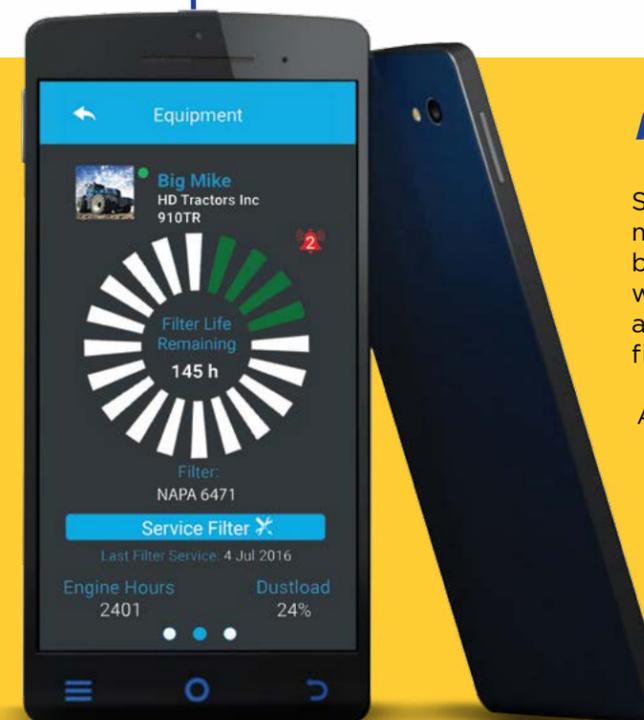

The Senzit app is the brains of the whole system. Once attached, the app gets real-time analytics by measuring several parameters using one of the 10 Senzit sensors. This is what helps you keep track of air filter life and so much more. Now, you can avoid excessive filter cleaning that exposes the engine to extra dust and debris. Senzit has been designed for heavy-duty applications and works with any air filter brand. It's the latest in filtration technology.

**To download, go to Apple's app store or Google Play store and search for the Senzit app.**

### NEW TECHNOLOGY FOR FILTERS

Protect your vehicles with the new Senzit:

-  **Protects your engine and equipment by monitoring your air filter's real-time dust load**
-  **Saves time and reduces frequency of air filter maintenance**
-  **Extends filter life by maximizing capacity**
-  **Functions in the harshest conditions and is compatible with any filter brand**

### PLAN ON SAVING MONEY

Senzit is both rugged and smart. It will teach you more about your vehicle than you ever knew before. Eliminate unplanned downtime. Find out where your vehicle is currently located with a dynamic GPS map. Discover how long your filter has been in operation. And save money.

An agriculture customer who cleans filters daily, per Senzit, can save \$2,400 each year in labor costs per vehicle.

With years of filtration expertise, NAPA Filters is providing a new method of monitoring filter status to reduce downtime and repair costs.
